PlayCISO

AT A GLANCE

Practise security work before it happens for real.

PlayCISO is a hands-on training platform for security people. Work through labs, lead incidents in the Cyber War Room and use security tools, all in the browser.

SIMULATIONS

Cyber War Room

Branching incident simulations. You lead the response, and every decision changes what happens next.

PRACTICE

178 hands-on labs

Incident response, SOC triage, detection engineering, forensics, cloud, identity, GRC and more, scored as you go.

IN THE BROWSER

Security tools

Scanners, checklists, calculators and everyday utilities. Nothing to install: every tool runs on the site.

BRIEFINGS

Breach Index and news

Plain-language write-ups of breaches and vulnerabilities, with what security leaders should check this week.

Who it is for

Students and career changers, SOC and GRC analysts, security engineers and security leaders who want reps on the decisions their job is made of.

Getting started

A free account includes 3 runs across tools and labs and 3 Cyber War Room campaigns. Downloads and exports come with Pro.

178 labs: counted from the PlayCISO lab catalogue on 2026-11-26.
