PlayCISO

STUDENTS AND NEW ANALYSTS

Build the skills the first job asks for.

Interviews ask what you would do on a real shift. PlayCISO gives you that shift: realistic, synthetic cases you can work in the browser and talk about with confidence.

INCIDENT RESPONSE

IR Playbook Lab

Be the incident commander for scenarios from ransomware and BEC to a web shell and DDoS extortion.

SOC

SOC triage

Triage a stream of synthetic logs and realistic cases, set priorities and pick the first action.

DETECTION

Detection Lab

Work SIEM detection tickets across Windows, Sysmon, Linux, CloudTrail, proxy and EDR logs.

FORENSICS

Forensics Lab

Tag evidence, say what it proves and build the timeline from real artifact types.

For lecturers and club leads

Run the IR Playbook Lab as a class: create a class and students join with a code. Scorecards and practice certificates can be shared.

Start here

A free account includes 3 runs across tools and labs and 3 Cyber War Room campaigns. Downloads and exports come with Pro.

PlayCISO labs and certificates are practice only, not an accredited qualification. Find more at playciso.com/students.
